At-A-Glance Median Accrual Ratio (MAR) Metric Expanded Pilot

**Rationale for this metric**
A key value of the consortium is the demonstrated ability to mount and complete clinical trials in a timely and efficient manner.

- Failure to meet target accrual numbers is pervasive
- The Median Accrual Ratio (MAR) metric is a step to getting there

**Why an expanded pilot**
This approach:

- Recognizes the different stages that hubs are in collecting data on accrual.
- Will allow greater understanding of the types of Clinical Trial Management Systems (CTMS) and other data collection systems hubs are using, and gather information on operations, processes, and needed resources relative to the MAR metric.
- Will provide two options for participating as well as an option for declining participation.

Additionally in response to concerns about data comparability, one component of the expanded pilot takes advantage of the fact that over 20 CTSA institutions, based on information available to CLIC, use OnCore as their CTMS. Convening one arm of the expanded pilot specific to OnCore provides the opportunity for CLIC to work to learn more about the system to better assist the hubs in using OnCore for the MAR.

**Why participate**
This provides the hubs an opportunity to shape the progress of the MAR moving forward.

**The Options**

**Participate: Hubs with OnCore CTMS**
- Establish and meet with MAR team
- Select to participate via the RedCap survey by March 31, 2020
- Submit 2020 numerical data and TTC plan by August 30, 2021
- Participate in CLIC organized webinars and office hours, complete assessments at midpoint and post pilot

**Participate: Hubs with other CTMS or Data Collection System**
- Establish and meet with MAR team
- Select to participate via the RedCap survey by March 31, 2020
- Submit 2020 TTC Plan by August 30, 2021
- Hubs that are able to collect 2020 numerical data are welcome to submit it by August 30, 2021
- Participate in CLIC organized webinars and office hours, complete assessments at midpoint and post pilot

The University of Rochester Center for Leading Innovation and Collaboration (CLIC) is the coordinating center for the Clinical and Translational Science Awards (CTSA) Program, funded by the National Center for Advancing Translational Sciences (NCATS) at the National Institutes of Health (NIH), Grant U24TR002260.
Decline participation:
♦ Decline participation via the RedCap survey by March 31, 2020
♦ Hubs will be asked to indicate the primary reason(s) they are declining to participate in the expanded pilot.

RedCap survey
The purpose of this survey to determine which hubs will be participating or declining participation in the MAR Metric Expanded Pilot.
♦ Only one response per hub is needed
♦ Deadline for selecting to participate or decline participation is March 31, 2020

CLIC’s role
♦ Technical assistance at common_metrics@clic-ctsa.org
♦ Resources on MAR Metric Web page
♦ Webinars and office hours
♦ Assessments and reports

Next steps
♦ Review the MAR Expanded Pilot Webinar
♦ If you have questions after reviewing the Webinar and the At-A-Glance MAR Expanded Pilot:
  Attend the MAR Expanded Pilot Office Hour on March 12th at 2pm EST Register
♦ Complete one survey per hub by March 31, 2020 *Survey link is being provided in a separate email sent to Principal Investigators, Administrators, and Evaluators.
